Practical - 1

Practical Title: Project Initiation, Requirement Analysis, Sitemap, Wireframe, and GitHub Setup

Problem Definition: Initiate the semester-long Student Hub portal by identifying the problem scope, user roles, key modules, navigation flow, and minimum 10 pages. Create a sitemap, low-fidelity wireframe, project folder structure, README file, and GitHub repository.

A. Theory

1. What is URL and parts of URL?

Answer:

A **URL (Uniform Resource Locator)** is the address of a web page on the internet. It helps the browser find and open a website.

2. How does HTML file **process in web browser?**

Answer:

When we enter a URL, the browser requests the HTML file from the server. The browser reads the HTML code, loads CSS and JavaScript, and then displays the webpage on the screen.

3. How will page navigation flow managed among all HTML pages?

Answer:

Every page has navigation links that connect to other HTML pages.

US/docs/Learn_web_development/Core/Structuring_content/Creating_links?

4. How will GitHub commits be maintained after each practical?

Answer:

After completing each practical, the updated files will be saved, committed, and pushed to GitHub with a clear commit message.

E. Challenges Faced:

I have problem in how to add my wireframe pdf in my git hub account so I am fixed this problem by asking to google and ai.

F. Learning Outcomes:

I am learning many things like how to make a wireframe for my practical 1 and how to use a git hub account for my repositories.

Faculty Remarks:
